

K-LOVE is an important music service to our Tucson community. The secular radio stations continually play music that is at best borderline in terms of content and this is one of the few stations that can be played without fear of offensive subject matter or verbiage. With the expansion of LPFM broadcasting, it is obvious that any protections K-LOVE's signal has would disappear (it is tough enough in some parts of town to get a good signal as it is). K-LOVE's music and programming goes to the heart of the moral fibre of our society. At a time when "anything goes" this is one of the few stable sources reminding us that we have a GOD who is in control of our world and our lives and that message has saved many people from certain death. We hear those testimonies daily. Don't mess with K-LOVE's ability to reach everyone in our community.
